

# CyberExams

## Practice CyberExams

All of Advanced Flight Theory's professional theory courses contain our [Practice CyberExams](#) for each subject, including a personalised Usercode and Password with four Marking Credits per subject.

Our Practice CyberExam system is to help you determine if you are fully prepared to attempt the actual CASA PEX0 Exams for each subject. Although we do not test actual CASA exam questions, the Practice CyberExams do show you the workload involved in the actual CASA PEX0 Exam.

Our Practice CyberExams have proven to be very popular with our students. Since our system was first created, we have had over 14,000 different aeroplane and helicopter pilots attempt our exams and approximately 20,000 Practice CyberExams are sat via our system every year.

For more information on our Practice CyberExam system please read our [Frequently Asked Questions](#).
